

TOWN OF TREMONT

SMOKING POLICY

All Tremont facilities accessible to the public will comply with State Law prohibiting Smoking in all enclosed areas of public places.

Medical evidence implicates smoking as a serious hazard to the health of the smoker and non-smoker. Continued research suggests that passive smoke is as dangerous to the non-smoker as it is to the smoker.

In keeping with the Town of Tremont's intent to provide a safe and healthful work environment, smoking is prohibited throughout the workplace.

The smoking of cigarettes, cigars, pipes or other objects giving off smoke in any town-owned building, other structure under the control of the town, vehicles and equipment is prohibited.

The Smoking Policy described above, is adopted and implemented this nineteenth day of January, 2004.
